

## Output:

The screenshot shows a Sublime Text editor window with a file named `PracticalNo1.java` open. The code is a Java program with a `main` method and a `CompanyData` class. The `main` method creates a `CompanyData` object and calls its `display` method. The `CompanyData` class has a default constructor and a parameterized constructor. The output of the program is displayed in a Windows Command Prompt window, showing the directory listing of the desktop and the execution of the Java program.
